Product Spotlight: Blume Superfood Drink Mixes

Here's a few hot tips for tasty drinks:

Spices aren't water soluble so some sediment is normal. Using whole ground ingredients means maximizing the nutritional benefit of the ingredients and there will be some sediment and texture. These tips aren't to dissolve the blends but rather to suspend them for the best experience.

Add a binder

Spices aren't water soluble so some sediment is normal, as is the texture. Our blends are microground and not water soluble, so they aren't meant to fully dissolve.

Use the right amount

The most common mistake we see with our lattes is using too much of the blends. Most people are used to using heaping teaspoons of sweetened drink mixes but our blends have no fillers, which means a little goes a long way. Try 1/2 teaspoon and see if that helps with the strength of the flavor.
